

Subodh Nikumbh

Dallas, TX | +1(512)-740-7322 | nikumbhsubodh10@gmail.com | www.linkedin.com/in/subodhnikumbh/

Graduate student at UT Dallas specializing in Business Intelligence and Data Analytics. Experienced in transforming complex data into actionable insights through tools like Power BI, Tableau, SQL, and Excel. Skilled at building dashboards, automating reports, and supporting data-driven decision-making across finance and operations. Passionate about leveraging analytics and AI-driven automation to enhance operational efficiency and digital transformation

EDUCATION

The University of Texas at Dallas

May 2026

Master of Science, Information Technology Management (Business Intelligence and Data Analytics)

University of Mumbai

October 2020

Bachelor of Engineering, Information Technology

PROFESSIONAL EXPERIENCE

Yashtantra Technologies | Software Development Engineer

January 2021 – May 2023

- Designed and implemented design systems for client's website campaigns using Figma and Sketch, improving consistency and user experience, which contributed to a 10% increase in user engagement
- Applied AI-driven analytics (heatmaps, clickstream tracking) to interpret user data and generate actionable business insights, optimizing engagement metrics by 15%
- Established comprehensive design documentation and style guide standards across all client projects by creating reusable component libraries that reduced design-to-development handoff time by 30%
- Utilized data analysis, user testing, and process improvement frameworks to enhance product performance, reducing funnel drop-off by 25%

PROJECTS

Cargo Aviation Analysis of Airlines using Power BI, Excel

- Analyzed global airport cargo data for performance insights and industry trends
- Focused on key metrics including Average Revenue per Flight, Yield, Load Rate, and Revenue per Load
- Developed Power BI dashboards to track revenue and yield trends, helping identify top-performing routes

End to End SQL Scripting for Indian Railways Database

- Created an end-to-end database from scratch, integrating raw data into Visual Studio Code based MySQL database
- Developed an ER diagram for Indian Railways Database with 30,000 trains in the Central Zone of Indian Railway
- Conducted thorough data cleaning in Excel, eliminating 575 duplicates, 350 null values, and filtering outliers
- Designed a streamlined MySQL database based on the ER diagram, reducing redundancy by 20%

HeartMath Wearable Heart Rate Monitor

- Collaborated with HeartMath's Inner Balance Coherence and emWave2 clients with limited dexterity to track heart rate variability, improving tracking accuracy by 20% through tailored support
- Conducted risk analysis (PFMEA) and ensured compliance with FCC guidelines to design client-specific solutions that reduced potential product risks by 10%
- Supported clients by 3D printing custom finger-sensor supports, enabling autonomous use of HeartMath's ecosystem, which increased client's independence by 75%

TECHNICAL SKILLS and CERTIFICATIONS

Software & Tools: Python, Java, C++, R, SQL, Power BI, Tableau, Microsoft SQL Server Management Studio (SSMS)

Data Analysis: Statistical Analysis, Data Visualization, KPI reporting PowerPoint, MS Office, Google Analytics
