## Professional Summary

---

Financial operations and data Consultant with 2+ years of experience in databases, analytics and business systems, operational reporting and system improvements. Strong foundation in Advanced Excel and SQL with experience analyzing large datasets, maintaining audit documentation and supporting UAT in Agile environments.

## EDUCATION

---

### The University of Texas at Dallas

Jan 2025 - May 2026

M.S., Information Technology and Management

Dallas, TX

- **Coursework:** Data Management, Advanced Statistics, Business Data Warehousing, Operations Management, Systems Analysis & Project Management, Object Oriented Programming (Python), Cloud Computing Fundamentals

### University of Mumbai

Aug 2016 - Oct 2020

B.S., Information Technology

Mumbai, India

## PROFESSIONAL EXPERIENCE

---

### Confer Solutions AI

Jan 2026 - May 2026

Data Analytics Consultant

Dallas, TX

- Analyzed customer-journey and operations data for JKYog (nonprofit serving 250,000+ users) to identify workflow and service gaps; created a conversational AI bot and provided a roadmap for improving operational efficiency
- Automated Stripe and Google Maps workflows, increasing event RSVP and donation conversion processes by 30%
- Strengthened data quality by improving customer-data validation and chatbot response accuracy to 75% through resolving data-quality gaps and AI hallucination issues

### Yashtantra Technologies

Jan 2021 - May 2023

Software Development Engineer

Mumbai, India

- Developed Python/Pandas data-quality workflows to clean, validate, and process client datasets, reducing data-preparation time by 30%
- Built Power BI KPI scorecards and stakeholder dashboards for operational reporting, enabling faster decision-making
- Analyzed recurring system bottlenecks and tracked issue resolution in Jira, contributing to a 15% reduction in operational costs

## PROJECTS

---

### Multi-Warehouse Inventory Management System [Link](#)

- Consolidated data on inventory, purchase orders, warehouses, and asset movement to improve operational visibility
- Modeled demand-driven replenishment policies using safety stock, supplier lead times, and demand patterns
- Built a scalable Python and SQL ETL pipeline for 1M+ retail transaction records across multiple warehouse locations

### SupplyShift AI - Supply Chain Strategy Simulator [Link](#)

- Built a supply-chain simulation to model trends, seasonality, prices, safety-stock decisions, and customer demand
- Evaluated inventory and pricing scenarios using customer orders, stockouts, storage costs, and total-profit metrics
- Analyzed tradeoffs across product availability, inventory cost, and demand uncertainty across products and warehouses

### Healthcare Claims Denial Risk & Revenue System [Link](#)

- Programmed a risk model with 10,000 claims records to identify patient cases most likely to be denied
- Prioritized highest-risk 20% of claims to capture 45% of denied revenue and performing 2.2× better than random review
- Developed PostgreSQL pipelines and Power BI dashboard to identify risk drivers and recommend corrective actions

## Skills

---

- **Programming and Analytics:** Python, SQL, Power BI, PostgreSQL, Pandas, NumPy, Advanced Excel
- **Operations:** Inventory and Supplier Management, Procurement, Forecasting, Audit Documentation
- **Data Systems and Delivery:** SAP, Snowflake, Databricks, MS Office, Salesforce, UAT Testing, Agile, Jira

## Certifications

---

- Databricks Certified Data Engineer Associate
- Claude Certified Associate - Foundations (CCAO-F)
- SQL (Udemy), Python (Udemy)
